MET. BALLOON.

American weather experts say the weather pattern over the United States has been changing, and they want to know why. Giant balloons are sent aloft bearing instruments which may help to provide the answer. An automatic radio signals temperature, pressure, and humidity to the experts below.

There she goes! Bound for the stratosphere, the balloon will expand considerably as it rises. The instruments will supply new information on jet streams, storms and pressure patterns - clues to the mystery of the weather.
