

ATOMIC BLAST

Weist-Fitzgerald

~~The~~

X The United States begins atomic tests in Eniwetok Atoll in the South Pacific. This is Runit Island, where mysterious installations have been constructed for the first test -- the explosion of a nuclear weapon equal to perhaps ten thousand tons of TNT. We will see the blast from sea and air:

(BLAST)

~~Explosion~~

X A mushroom cloud marks a different atomic blast -- smaller, but considered five times more effective for its size.
