- 62 LS The party in progress

NB Kathmandu is a city of temples, with the population of about 8 lakhs including surrounding towns and villages. It is queer mixture of old and new. On account of lack of transport for distribution of various commodities in this valley about 1/3 of population lives on lead carrying ~~man~~ trade. The remaining population can be well divided between (a) agriculturists and (b) traders, Govt. servants and the army.
