AIR MARKSMANSHIP.

America shows off its latest tactical weapons at an Air Force Base in Florida - starting with high-explosive rockets.

After the rocket fighters come the light bombers with their powerful napalm bombs, which can reduce a building to a flaming inferno in a split second. A second bomber wave comes hurtling in on the tail of the first, attacking its target at roof-top height.

And a third wave with its devastating load - reminding us that even without nuclear weapons - modern warfare is more deadly than ever.
