**AIR MARKSMEN
ON TARGETS:**

A rain of lethal fire pours from the sky as the Air Force shows off its newest tactical weapons. This is a fiery study in air-ground support at Eglin Air Force Base in Florida.

Bombs loaded with napalm show what they can do to an inflammable target.

Light bombers come in on the tails of the fighters, raking the ground with high explosive destruction.

An awesome demonstration of firepower from a combat-ready Air Force.
