

IT'S C-C-COLD ON EAST COAST!

The deep freeze takes over in Boston. Trawlers of the fishing fleet stand idle in the grip of Ole Man Winter. Sub zero temperatures throughout New England have crippled the fisheries industry. The crews are busy chopping off the ice-encrusted rigging, hoping for a break in the weather.

The pattern is duplicated at Niagara when the famous falls are revealed in frosted splendor.

So far, the winter has produced record breaking low marks in all States of the Northeastern seaboard. And if the cold takes away the breath, it's still breathlessly beautiful.
