## XI. International Wintersports Week in Garmisch-Partenkirchen

0-0-0-

### Ski Jumping

Garmisch-Partenkirchen and other European ski centers experienced an out-of-the-season spell of sunny spring weather which let all the snow up to 1500 metres high disappear overnight. However, the international jumping event on Europe's biggest jumping installation took place according to schedule. Units of the Alpine troops of the new Federal Armed Forces made the impossible possible. Together with special working groups, in day and night shifts, snow was brought with lorries from the coldest alpine spot and mixed with cement! The jumping hill was ready for the assembled and impatient European acers. Thousands of enthusiastic fans watched the ski elite of Europe. It was a most exciting experience - this winter sports event in the warm and sunny spring weather!
