15th May, 1957.

Dear Sirs,

M.L. UTILITY AIRCRAFT.

Since the announcement was made that the M.L. Aviation had received from the Ministry of Supply a contract to develop an aircraft incorporating an inflatable-wing, we have had many requests, in particular from publication departments, to see the aircraft in flight.

A stage has now been reached where we are able to invite you to send a representative to witness/photograph a demonstration, which it is hoped will take place during the next week or so. We are, however, conditioned by the weather, and only a day's notice of the actual time and place may be possible.

Should you wish to attend, we will be getting in touch with you by telephone to let you have detailed arrangements.

Yours faithfully,
M. L. AVIATION COMPANY LIMITED.

M.R. Mobbs
