**SAUCER BOAT TAKES
FIRST SPIN!**

The flying saucer goes nautical. Using the lines of the mysterious astral ships from outer space, a Milwaukee boat builder designed this unique craft for fishing in the round. No crowding, plenty of deck space for everybody, and no crossed-up tangle of lines when the fishing begins. Powered by out-board motors, it can run circles around conventional craft when it comes to tricky maneuvers.

No more excuses about the big ones that get away. This craft can go round them till they're dizzy.
