

POLYGOON - HAARLEM
HOLLAND.

Greatest Sideway-launching in Dutch Shipbuilding history.

Length: 23 M.

In Terneuzen, the most important port in South-West Holland (near the Belgian border) one of these days all was ready for the sideway launching of the "Olivia Winther", in a waterway which has a width of 50 metres.

The ship was built for a Danish ship-owner and with its 4600 ton and a length of 100 metres, this ship was the greatest ship ever launched sideways in Europe.

In some months the "Olivia Winther" will be put on freight traffic.
