TU - 114

The new super-liner TU-114 was designed by a group of constructors under the guidance of Academician Andrei Tupolev. This biggest airliner in the world has a seating capacity of 220. There are three large saloons, one of which is of the restaurant type. In addition it has four compartments with berths. The ~~its~~ TU-114 has two decks. There is telephone communication between the upper deck and the kitchen situated down below. The food is brought up to the passengers saloons by a lift. The superliner has four turboprop engines and is capable of making a non-stop flight from Moscow to Peking or New York in 10 - 12 hours.
