

PEKES IN CLOVER.

Mrs. Ruby Patrick of Diddot thinks Pekes are misunderstood - and she should know; she has 14 of them, so well trained they won't snatch dinner till it's properly served. Pekes, apparently, are only yappy little beasts if you fill them with frustrations, complexes, inhibitions, traumatic experiences, and psychosomatic disorders. All they really want is their own centrally-heated block of flats, their own cooking arrangements, and well-adjusted egos - which Mrs. Patrick gives them. As a result, she insists, all 14 have beautiful minds. Of course, there's always someone who prefers independence in a garret!
