Motorized Ski-Jöring

Ski-Jöring is a most popular sport. It is mostly a one-horsepowered affair. But in our power-minded age an innovation seemed imperative. And here it is - a 5 H.P.-engine drives a propeller mounted on a ski complete with handles. All you have to do is to start the engine and off we go on the ice-surface of Lake Eibsee near Garmisch. Needless to say the first race with the new "Ski-pony" is due in the very near future!
