"High" WEDDING CEREMONY

Competition known : Fox

Positive developed : 58 meters - 193 ft

Two 19-year-old rope-walkers of the famous Equilibrist group calling themselves the "Sly companions" decided they would have a high style wedding.

While the tresp was performing in LA ROCHELLE the west coast sea port, the wedding took place before a tense and interested crowd according to the tradition of their trade... high up in the sky on a wire thrown between the two famous towers of the old port.

In her bridal attire, and in spite of the wind blowing into her skirts and veil, the lucky young and lovely bride deftly climbed up the lig ladder to the rope, where her bridegroom was already engaged on his trip to the middle of the way between the towers. Then it was the turn of a puffing Mayer to climb, the ladder....

High level wedding for rope-walking specialists!
