NATO ON PARADE.

5,000 Allied servicemen paraded in Mainz to mark the 10th Anniversary of the North Atlantic Alliance. Outstanding feature was the appearance of Germans in the parade. NATO C-in-C., General Nerstad, and his fellow commanders inspected the units, which were contributed by most of the fifteen member-nations of the Alliance. German paratroops were prominent in the march past the saluting base.

On the rostrum with the generals was German Federal Minister Von Markatz. Next in the march came the Americans.

General Valluy saw his countrymen in a typical French display.

No contingents looked smarter than the British, part of our contribution to the Alliance which has for ten years preserved peace.
