

YOGI IS A WOW IN GERMANY.

Swami Murti does warming up exercises before his act in Hamburg. He's a Himalayan Yogi. You too could bend iron bars if you studied Yoga, the Indian cult which brings health, strength happiness - pretty well the works to its followers. Now a short rest. It has to be taken on broken bottles to get the full benefit.

Half the battle is knowing how to breathe.

Just how strong Yoga can make you, and how insensible to pain, Swami shows by inviting some of the audience - about a dozen to add a little weight to the performance.

Swami proceeds to make light of a cameraman, suspended from a rope tied to his hair.

Seeing's believing. Throw away your health card, practice Yoga, laugh your bloomin head off, and life should be one long bed of nails!
