NIXON WOOS TEXAS.

To Dallas for the famous Texas State Fair went Vice President and Mrs. Nixon. Seldom nowadays called Tricky Dicky, even by his opponents, Nixon is just about the most popular political figure in America, after Eisenhower. And as he very much wants the support of Texas in the next Presidential election he made a point of being in Dallas for the big Fair. It reflects the high prosperity of the State. One of the prominent features is the Motor Show, with its evidence that the industry is turning attention to the smaller cars. Compact cars, they call them. Just the thing, say the oil millionaires, for Junior to use when he has a date.

When it comes to impressing the Joneses, Americans still like an automobile that's so long it's almost a one-car traffic jam. And fortunately the 'compact' models don't cut into the British car-exports to the States, which are higher than ever.
