BABY GORILLA BORN IN SWITZERLAND

35 mm. developed dupenegative : 48 meters - 160 ft  
From Cine Journal Suisse.

No lbs

Achilla, young Mrs. Gorilla gave birth lately to a baby Gorilla and since has been the object of her keeper's most attentive cares. Mr. Stephi, father-gorilla does not seem to have acknowledged the event which has made some sensation throughout the Continent.

For the second time only ~~in Europe~~ a baby gorilla is born, outside of Africa, and Mrs. Lang, wife of the Zoo Manager Dr. Lang has taken baby GOMA in hands, taking care of her just as she did 20 years ago of her own children.

World specialists are anxiously following Mrs. Lang's unique experience, of bringing up a baby of the greatest anthropoid, in man's society.

This is at the Basle Zoo

It is *Camp* *Goma* 4 lbs

*Pathe* *any* 3 hrs
