

From Blick in die Welt.

ALCOHOL AT THE WHEEL.

To mix Alcohol and Gasoline is a very bad habit. It can become very dangerous. This gentlemen will not very long possess his driving licence. For people like him there is a new invention - "The Alcoholomat", the liquid measure will be noted through his breath. The cold shower bath brings some recovery!

CROSSING OF RAILWAY TRACKS.

There shall not any longer occur accidents at Railway tracks. Before crossing of the Railway line everyone has to satisfy himself that no train is approaching. To lay the ear on the track will give notice of any danger. Just to look around even with binoculars will not be sufficient. Confident that no train is approaching, the track may under circumstances be crossed but with the greatest attention!
