

NEW GUN FOR ARMY.

Latest artillery weapon in the British Army is the very mobile 105mm howitzer, now demonstrated by the 33rd Parachute Light Regiment. One of the howitzer's virtues is that it can be quickly assembled and dismantled, to be taken by road or air. It's of Italian design.

It fires a 30-pound shell an extreme range of nearly six miles. It's highly effective at close range too..
