The Ball-Boy Roboter

Hitherto trainers of tennis, which is becoming ever more popular, were handicapped by the necessity of serving balls by the score to their pupils. Certainly an enormous exertion!

Nowadays the "Ball-Boy-Roboter" does this for them. The trainers are free to watch their pupils and can correct their movements on the spot.

The throwing-machine is certainly an innovation for the best of trainer and pupil - and "Whisky" likes the cannonade of white balls too !
