CAMPBELL CRASHES.

60/76.

Bluebird is wrecked; Donald Campbell lies in hospital. That is the appalling news as we go to Press. It happened on a trial run at Bonneville Flats. We filmed Donald and his wife, Tonia when the million pound wonder car product of the best brains in British Automobile Industry, was brought onto Goodwood race track. Campbell was supremely confident and some, behind-the-scenes, would have not been surprised if Bluebird had eventually exceeded 500 M.P.H. But this year, the intrepid man was not destined to prove it. Early reports say that on that ill fated trial the car topped 300. On the return run she slipped over. It is almost a miracle that Donald Campbell was extricated alive.
