Mr. Cummins emphasises that he does NOT want a lot of footage shot. The best parts of the story, as far as can be judged from this newspaper report, are to be found in the Hairdressing Dept. and the Restaurant.

However, other departments must be shown, but briefly.

This will "spread" the story, making it clear that several trades and occupations are taught at the college.

When shooting, try to visualise the eventual Cut Story, remembering that most negative that ends up in the bin would not have been shot at all if the Cut Story had been in the cameraman's mind from the beginning.
