GLIDING THRILLS OVER THE ALPS

50 metres
Exclusive

With the German championship in gliding close ahead an UFA-team of flying-specialists was assigned to watch the training of German aces in the first Alpine gliding School at Unterwössen (Chiemgau).

The wind from the Chiemsee (lake) is constant from 5 to 7 hours daily. The present duration record is 9 hours 16 minutes. Last year more than hundred gliders flew more than 5 hours.

The performance of the gliders is most thrilling when stunt flying is being practised. However, the trainees were told on arrival that if they should have arrived by car, the most dangerous part of their venture was behind them. Indeed this is not our impression when we see these alpine scenes.
