

INSTANT GARAGE

The sign of happy motoring is a bit misleading if your house has no garage. But don't worry. At small cost you can fit the squeezebox type, and it can rain, hail and freeze without harming the car. A handyman can fit it himself between spring showers. The plastic and terylene canopy will keep out any weather.

But what if junior members of the family want accomodation? Simple: The squeezebox comes in all sizes. And as well shall soon be having one of our beautiful summers, the big garage can be used as a garden house, shading you from the burning sun. If you're a pessimist, you can put central heating in it.
