WITH THE R.A.F. IN FRANCE

THE R.A.F.'S WEATHER EXPERTS ARE AT WORK IN FRANCE.

THEIR JOB IS TO FIND OUT ABOUT FLYING CONDITIONS IN THE UPPER  
ATMOSPHERE. ONE WAY OF CHECKING UP IS BY RELEASING SMALL

BALLOONS, WHICH ARE THEN SIGHTED THROUGH DELICATE INSTRUMENTS.

FROM THE DIRECTION THE BALLOONS TAKE ....AND THE SPEED AT WHICH THEY  
RISE..... WE CAN FORECAST THE CONDITIONS OUR PILOTS WILL FIND UP THERE.

IN THIS WAR NATURE IS HELPING OUR AIRMEN. BECAUSE MOST OF THE  
WEATHER CHANGES, THE DEEP DEPRESSIONS AND HIGH PRESSURE SYSTEMS WHICH  
WE USED TO HEAR ABOUT BUT DON'T ANY MORE, COME IN FROM THE ATLANTIC,  
AND ROLL ACROSS EUROPE FROM WEST TO EAST.

SO IN BRITAIN AND FRANCE WE GET THE CHANGES IN THE WEATHER JUST A LITTLE  
WHILE BEFORE THEY DO IN GERMANY.

AND THAT'S WHY THERE ARE NO MORE WEATHER FORECASTS....

BUT THE ROYAL AIR FORCE IS ON THE JOB .... WHATEVER THE WEATHER.

THEY DON'T DARE IF IT SNOWS.
