PLANES ACROSS THE BORDER.

We are at one of the worlds few unfortified frontiers....
between Canada and the U.S.A. Canadian Troops guard their
sideas another batch of American built bombers is coming over
to help us in the war. Under the neutrality law no U.S. pilots may
fly into Canada.... and no Canadian may fly in the U.S... so there's
nothing for it but to tow the planes over the lineBut that' as good
asway as any.... as long as we get the planes. Once they're over
Canadian Pilots fly them to the bases so its thanks again to our
American cousins.
