WAR CARGOES FOR THE ALLIES.

In New York Harbour they've set up a thirteen acre foreign trade zone, and its jam-packed with goods for the Allies. Wheels for our armies, wings for our Air Force Eight bombers are being loaded aboard a British Freighter. And sixty more are stored in the shed. There are also goods for GERMANY... that she bought before the war. but it will be quite a long time before she can get hold of them. There are automatic trench diggers for the Western front, altogether eighteen and a half million dollars worth, and plenty more where they came from.
