FINLAND FIGHTS ON.

Yet another Air Raid on Helsinki. This time, the camera catches the horror, these dastardly attacks bring into the lives of the children, as they dash, terror stricken to the shelters. It is tragic... that kiddies should be made to suffer in this way. Even war is no excuse.

But the Finns are a Gallant people. Actually, during this particular raid, the firemen dealt with many conflagrations.... All this, in a temperature thirty degrees below!

And now for the aftermath, of the battle of Suomussalmi, in which the Finns were gloriously victorious, ~~more~~ over the Russian Hordes. Here are a few of the prisoners, taken by the defenders.

The Finns treat their prisoners well, although their own food reserves suffer considerably, in consequence.

The defeated 44th Russian Division, abandoned thousands of tons of modern war material, in their flight. Guns, Tanks, cars and lotries by the hundred fell into Finnish hands, and will soon be turned against their former owners.. It is estimated that the booty in this action is valued at over a million pounds.

The Finns do not have to rely upon lying reports of their activities and successes.

These pictures prove their words. FINLAND FIGHTS ON.
