NEWS FROM FRANCE.

Members of the Foreign Press Association, are on a visit to the B.A.F. at the Western Front.

They represent many of the newspapers in Neutral countries....

Apart from military secrets we have nothing to hide. We are fighting our war in the open. Our propaganda is truth.

Belgium too is showing off her preparedness.

This is one of her Coastal Batteries... Where the men live in bomb proof blockhouses. They can be ready for action within a few seconds. The huge guns are mounted in sunken pits.... All along her coast line. But Belgium need have no fear from the West. Aggression is no part of our Policy. And German Warships will hardly dare to operate in seas that are policed by the Royal Navy.

There lies Belgium's best hope of security.
