**NAZI KULTUR**

Paris sees the latest example of the delightful work of her Nazi friends. A U.S. Ambulance unit returns from Service at the Front. On the way back it was repeatedly machine gunned from the air. Neither the Stars and Stripes, nor the Red Cross saved it from deliberate attack.

There is now also definite proof that some Germans are using Dum Dum Bullets, this type of ammunition has a hard point, which penetrates the body. But the rest of the bullet is made of soft metal.... which expands on impact....causing gaping wounds often inches wide. This is 'Kultur' as the Nazis practice it.
