THE KING VISITS SMALL ARMS FACTORY.

Here is the man power behind the man power in the field.

Its just a typical Sunday morning, in every factory and workshop, making war supplies.

Today His Majesty the King spends a Sunday with his workmen, among the roar of the machines.

This factory is making small arms, mostly rifles and machine guns.

His Majesty is accompanied by the Minister of supply... Mr. Herbert Morrison.

The King and His Ministers are well pleased, with the response to the call by Britain's workers.
