CANADIAN AIRMEN ARRIVE.

Still more man power for the Island Fortress that is Britain. Great ships from across the Atlantic... conveyed by the Royal Navy....bring Canadian Airmen and the first Canadian Nurses. And it looks as ifn they're glad to be here.

Our factories are turning out more planes than ever before. More and more planes are arriving from the U.S. The Pilots are ready... to step straight into the cockpits of our fighters and bombers. The first job on stepping ashore is to send a cable back home. "Just arrived in the old Country. Its grand to be here, and it won't be long now before the Bosch hears from us. So don't worry mum... the old Country's going to be alright.
