POTS AND PANS FOR PLANES.

Its the charge of the Light Brigade.

But this time Mr. & Mrs. John Citizen are charging into centres all over England with the light metal Aluminium, which is so urgently required for aeroplane construction.

I didn't know they're making Jerry'dHelmets out of Aluminium.

Men, women and children, are all turning into travelling junk men, and Mr. Walker is not the only one who wants to know if you have "come across some nice aluminium how-do-you-do's-Chums".

Father is doubly keen to send in as many pots and pans as he can... look at the washing up it saves - - THANK YOU EVERYBODY.
