ANOTHER BABY AT LONDON ZOO

Don't look now but this is Mrs. Bison, who is out and about again after presenting the London Zoo with the teeniest, prettiest, cleverest ... but here's the baby girl herself. The apple of her mother's eye and a regular pippin, baby's so tired and she's just got to have her morning rest. You would have to go along way to lick Mrs. B's favourite daughter, but she can do it quite easily. A baby Bison is a very rare occurrence and mother knows she's a very rare child. Only a day old she hasn't quite got her sea legs. Mrs. Bison and babe are front page news, Mr. Bison doesn't count and even if he could, luckily for him it's only one.
