DUTCH EAST INDIES.

With Holland under the Heel of the Nazis, life goes on as usual in the Dutch East Indies, but only on the surface. Seventy million natives depend on the intelligent rule of Dutch Administrators for their well-being.

Let us remember that the Dutch East Indies are still Dutch controlled, and that the Dutch are our allies. America too is interested in maintaining the "as you were" in this portion of the Netherland's Empire.

The state of living is traditional. Pigs have been transported this way (Hullo Hitler) ever since time began.

And the people will carry on as usual until Holland is itself again.
