

**HELPING WITH THE HARVESTING.**

Girls will be boys, down on the farm. This time A.R.P. Lancers are deputising for farm boys, who are busy on other food jobs, or preparing to cut down junipers and tie them in bundles.

Some of the girls are ambulance drivers, so their experience proves quite useful when it comes to driving tractors and reapers. To them its great fun; and if you can combine pleasure with utility its a grand thing these days. Its rather gimm to see crowds of beautiful - - or even being gathered in to help the war effort. "Nice" did I say? Its superb.
