MOSQUITO NAVY,

Here's a tale with a sting in it,

Flotillas of Motor Boats have been recently formed to act as patrol vessels for rivers and creeks. Strongly armed with machine guns, this Mosquito Navy is well able to cope with any Nazi Troop carrying airplanes.

Operating at night time, they can nip over our Island waters at great speed.

Named by Naval ratings, the Mosquito Fleet has a responsible job to do - but that's how they like it.
