

HOME GUARD SHOOT DOWN A BOMBER.

The Home Guard claim their first victim with the shooting down of a
Dornier by concentrated ~~gun~~ rifle fire. 180 rounds rapid fire
brought the dive bomber crashing to destruction. The Officer
Commanding the successful battalion congratulates his men.

(Speech)

Now a well earned tribute to the men of the anti-aircraft defences who
daily win glory in the protection of our land. The boys of the R.A.F.
would be first to acclaim the work of our gunners whose splendid
marksmanship is increasingly proving so costly to the raiding Huns.

Like a plague of locusts, the already shattered remnants of Hitler's
bombers are driven off and pounded mercilessly by gunfire; The withering
barrage is almost impossible to ~~be~~ penetrate... the devastating shrapnel
bursts forming a ~~thick~~ screen of death dealing fire.

Made in Germany.... finished in Britain.

The invincible union of pilots and anti-aircraft defences, proves that
as united they fight, so will the Nazis fall. Day and night our guns
are ready... to blast a menace which will continue to be swept from the skies.
