U.S. POLICE SHOW

The traffic cops of Washington are warming up for their new show and believe us they can do anything with those bikes except eat them. Fine upstanding chaps are those Washington police, men of dignity and balance. They'll go through fire and water to get their man and this is how they practise going through fire. That's a boy, burn them up. Are they happy ~~xxx~~ at their work? I'll say they are having a bumper time.
