OUR <sup>ARMY</sup> ~~ARMY~~ OF STEEL.

The mechanised might of Britain's Army in Egypt is disembarked at a Port in the Middle East. These are Wavell's Tanks, called after General Sir Archibald Wavell, our brilliant Commander in Chief, in the Middle East,... the very tanks that have played such a vital part in the crushing defeat inflicted on the Italians in the Western Desert.

With the War in the East now carried into enemy territory our Army of the Nile Continues its pursuit of the beaten enemy, into Libya. With Tank and Plane, gun and warship we have, in one smashing blow, brought Mussolini to the brink of Disaster.

In the land of the Pharoos, men from Britain's Commonwealth of Nations with our Allies have got the moment they had been waiting for. An object lesson in how to deal with Wops Nests.
