

JUNIOR R.A.F.

Manchester boys are rallying to the call for volunteers for the new Air Training Corps, "the young brother of the R.A.F.!" Quite a number of them are members of the air Defence Cadet Corps, and, in consequence, already have some knowledge which will be very useful to them in the new scheme. After final approval, measuring for uniform and other details of entry have been attended to, the boys settle down to learn all there is to learn about the machines they hope to be flying later on!

Lancashire alone hopes to form a hundred squadrons of the A,T,C, and that will be a grand effort towards maintaining the supremacy in the air, we are determined to achieve. They're a smart bunch of lads and "have got what it takes". Good luck boys! it won't be so long before you're in the finest Air Force in the world!
