THRILLS ON THE ICE.

~~On~~ On the frozen water of Lake Winnepesaukee specially adapted racing cars put on a programme of thrills for the folks of New Hampshire. Special tyres for the rear wheels and stumpy chassis, designed to check uncontrolled skidding, just don't mean a thing when the boys put their feet down hard. In a swirl of snow, the ice-cars go into dizzy, front and back-wheel skids.

Lockout - they're going to crash. Boy - do they love their work!

Every year its the same. The annual ice thrills send goose pimples down the spectators spines without fail. Cool daring that boils radiators but wins trophies.
