PATHE GAZETTE: 41/25. (DUBLIN)

ENTER THE BABY BUGGY

The first of Uncle Sam's mechanised units, the Baby Buggy, comes off the line at Michigan. They are the latest edition to the United States Army, in a lively stream the little cars pour out of the factory. They're light, fast and very easy to handle, and they can stand any amount of rough handling. The new babies can almost turn in their own tracks, the designers have certainly combined the art of making and shaking.
