**BOMBER No. 1000 leaves U.S.A
FOR BRITAIN.**

.....

The thousandth bomber just off the Assembly Line of a
California aircraft factory receives its first visitors.
Lord and Lady Halifax come to the crowded airfield to witness the
departure for Britain of Lockheed Model No. 1000 and to thank the
American craftsmen who built it.

Lady Halifax signals the take-off.

And the world famous pilot, Jimmy Doolittle climbs
aboard as the giant bomber gets away to play its role in the
Battle of Germany.
