WATER SKIING

Expert water skiers at Santa Barbara show how water skiing should be done by experts and if you are not very careful they will tell you that you must always put your best foot forward. When you know how you can hitch-hike behind a speedboat and skim the waves at a steady, or not so steady, 50. Boy, oh boy, is it a thrill. If wave riding gets monotonous there's the steeplechase. If you don't make it the first time well, that's a little ducking between friends. Over the top and the best of luck,. By way of a finale, a torchlight run, it's as exciting as it's spectacular.
