MR. MENZIES RESIGNS.

Following upon the news of the resignation of Mr. R.G.Menzies, come these pictures of his last public function as Australia's Prime Minister. The keel of the first Australian built 9,000-ton freighter is well and truly laid. Australia may change her Prime Ministers, but she will never change her policy of an all-in war effort.

Mr. Fadden, the Federal Treasurer now follows the magnificent lead given by Mr. Menzies who will continue to hammer nails into the Axis coffin. We Britishers have a great admiration for the Winston Churchill of the Southern Hemisphere.

Meanwhile, the Australian signature tune raps out its challenge.
