

PATHE GAZETTE: 41/85. (DUBLIN)

TON A TIME GUN

The coastal guns of California are being primed for the practise shoot and in the concrete emplacements ton weight shells are automatically loaded and charged with T.N.T. weighing 750 pounds. So into the breach and a 16 incher firing a ton a time rises for the first big hop with a range of 25 miles. A fine score gunners.
