**MORE AIRMEN FROM DOWN UNDER.**

Another big batch of Australian Flyers have completed their preliminary training, and the great adventure has really begun. A big parade through the city streets, a spot of pre-embarkation leave and then its all aboard for a crack at Hitler.

This is one of the biggest R.A.A.F. embarkations. With the safe arrival of the men at their destination these pictures are now released. The flower of Australian manhood, they will write history across the blue heavens. They will join other Sons of the Empire in the great aerial armada, that is clawing the Nazi menace from the skies of the world.
