Turkish O.C.T.U.

The Military College for officers in Ankara is a busy place these days. In the extensive grounds of the Academy are trained the future officers of the Republican Army. The Cadets are schooled in every branch of warfare suitable to the defence of their country. We know the Turk to be a good fighting man ready at all times to go into battle.

From the ranks of these trainees will emerge the infantry and cavalry officers of an army situated in a geographical hot-spot.
